

Who We Are

With regional offices in British Columbia, Canada, and Associates across North America, and overseas, Synergy's family of professional Business and Economic Development Consultants has served the private and public sectors, First Nations and government for over thirty years. We are an experienced, hands-on consulting firm with an excellent track record.

Synergy has always been considered as somewhat 'stand apart', different from other consultants. We get involved. We take a strong and personal interest in all our mandates, our clients, and in delivering results.

Synergy works to build relationships, not simply carry out assignments. We are roll-up-your-sleeves consultants, using our experience and expertise in a down-to-earth style.

Our years of experience in regional, national and international consulting to business, communities, First Nations and government have given us a unique perspective in dealing with challenges and opportunities in a personable and performance-driven manner. We pride ourselves in delivering what we commit to, and then some.

Synergy services all sectors:- resources, technology, arts & culture, health & wellness, tourism, hospitality, retail, construction, sports & entertainment, social media, film, and more. **Let's talk.**
